WORK SUMMARY

TEACHER ASSISTANT

RIT Croatia | January 2024 - May 2024

- As a student, I assisted my peers during lectures and offer specific tutoring hours for the ISTE240 course, known as Web and Mobile II. This course mainly covers CSS Frameworks, JavaScript, and PHP, alongside the basics of how web applications function.

FULL STACK DEVELOPER

Gjej.com | June 2022 - August 2022

- Created databases for different categories of products
- Maintained and improved the user interface and experience of the platform.
- Updated platform elements using JavaScript and JQuery.
- Collaborated and assisted the development team on identifying and fixing bugs.

WEB DESIGNER

Blue Marketing | June 2021 - August 2021

- Web design and content creator
- Improvement in User Experience

ADMINISTRATIVE ASSISTANT

CT Scanner | June 2020 - August 2020

- Billing and payment inquiries and execution
- Maintaining filing systems

ACADEMIC BACKGROUND

BA IN WEB AND MOBILE COMPUTING

Rochester Institute of Technology, Croatia | 2019-2024

HIGH SCHOOL

American School of Kosovo | 2016-2019

PROJECTS

Rochester Institute of Technology - Student App RIT Croatia

January 2024 - May 2024

Student App is an application which is made for RIT Croatia students. The app makes an easier way for students to get informed for news, events and different departments such as Academic Advising, Career Services, International Student Office and Alumni Relations, Student Services, and ITS & Facilities. The application is a mobile app which is native app. As a team we used expo go and react native for building the app. My role in the application was backend but I also served as frontend when needed.

- Creation and connection to databases
- Created CRUD operations for all databases
- Login and register
- Design the user interface and experience.
- Created three roles for users (student, admin and superadmin)

Poliklinika CT Scanner Website

May 2023 - August 2023

- URL: www.poliklinika-ctscanner.com
- Developed a comprehensive website for CT Scanner Polyclinic using Laravel, a powerful PHP framework for web application development.
- Responsibilities:**
 - Planned and designed the architecture of the site.
 - Implemented various functionalities using Laravel.
 - Ensured a user-friendly interface for easy navigation.
 - Integrated service details and booking functionalities.
 - Performed testing and debugging to ensure optimal performance.

GJEJ.COM - GJEJ.COM PLATFORM

June 2022 - August 2022

Gjej.com is a platform that will be used to provide information for every product or service of every business in Kosovo. In the near future the option for online payments will also be added. In this platform, businesses or individuals will be able to make posts about their product or service. Gjej.com will help people find whatever crosses their minds; From clothes to a place to work, to home accessories, cars etc. 'Gjej' in Albanian means "to find" so it's a platform where you can find whatever you want.

- Worked with OctoberCMS and CPanel to manage the data of the website
- Used Laravel for creating product and business categories on the platform.
- Used phpMyAdmin as a database
- Worked with JavaScript, JQuery, Bootstrap and CSS for the look of the platform.

Rochester Institute of Technology - KVIK BOOKING

January 2022 - May 2022

Kvik Booking is a University group project which I was part of. The purpose of the project or assignment was to build an application, which has a connection to 10 different databases and it can be used for anything. Me and my team choose a booking application that was build on HTML, bootstrap, CSS, JavaScript and PHP.

- Created the look of the website
- Used bootstrap documentation for building the page
- Creation and connection to databases
- PHP functions for login and registration
- PHP functions for leaving a comment, showing the comment and saving in the database
